

# Southwest Oregon Regional Airport Aviation Forecast

## Passenger Enplanements

An enplanement is a passenger that boards an aircraft at an airport. The enplanement forecast helps determine future requirements for airport passenger facilities, such as the size of the terminal and parking facilities.

## Passenger Enplanement Forecast

Year	Total Enplanements
2023	18,526
2028	28,361
2033	38,198
2043	57,873

## Aircraft Operations

An aircraft operation is when an aircraft lands, takes off, or conducts a touch-and-go procedure. The operations forecast helps plan future airfield infrastructure improvements and when they may be needed.

## Aircraft Operations Forecast

Year	Total Aircraft Operations
2023	16,916
2028	19,923
2033	20,760
2043	22,521

## Based Aircraft

A based aircraft is any operational and airworthy aircraft that is based at the Airport for the majority of the year. The based aircraft forecast helps plan for local aircraft parking and storage needs. \*Based aircraft were validated in 2025.

## Based Aircraft Forecast

Year	Total Based Aircraft
2025*	33
2028	34
2033	35
2043	36
