

Southwest Oregon Regional Airport Requirements

Airfield Requirements	Development Requirements	Recommendations
■ Extend Runway 5/23 to a total length of 6,400 feet ■ Add stabilized runway and taxiway shoulders ■ Remove Hot Spot 1 designation ■ Remove direct access to Runway 31 via C1/B1 ■ Update taxiway fillets ■ Add perimeter fencing to mud flat areas ■ Continue with plan to relocate Runway 5 glideslope outside of RSA	■ Expand terminal apron ■ Add hangar space for 15 aircraft ■ Expand transient apron ■ Add vehicle service road to fuel farm ■ Add Jet A fuel storage capacity ■ Expand passenger terminal parking	■ Add a wash rack ■ Add a restroom and Wi-Fi for T-hangar users ■ Improve CCAD operations and maintenance facilities ■ Add a space for electric aircraft charging

>>>Next Steps

1 Identify potential alternatives to meet facility requirements.	2 Evaluate the alternatives to determine the most environmentally, socially, and financially responsible plan.	3 Present each alternative to the public and seek feedback from the community. 	4 Prepare an implementation plan with a preliminary schedule and estimated costs.	5 Conduct a financial analysis and prepare a capital improvement plan.	6 Prepare the airport layout plan (ALP).
